Senior Full Stack Developer with 6+ years of experience building scalable web applications with Next.js, React, and Node.js on AWS and Kubernetes. Focused on system architecture, performance, and AI-assisted workflows.

experience **OverGroup** **2025 - present**

Development and maintenance of production frontend and backend systems using Next.js, React, Node.js, and NestJS. Deployment and operation on Kubernetes-based infrastructure. Implementation of new features, bug fixes, and performance improvements across production applications.

Criptoportfolio.com **2024 - 2025**

Development of the marketing landing page and a full-featured dashboard using Next.js and React. Implementation of responsive UI components, client-side state management, and integration with backend APIs for portfolio tracking and analytics. Collaboration on product architecture and frontend technical decisions for a cryptocurrency portfolio management platform.

OverGroup **2022 - 2024**

Led technology stack selection and system architecture design for cryptocurrency trading platform and mobile app. Oversight of development for two versions of the Overoption platform and a mobile application for a cryptocurrency exchange. Coordination with engineering on infrastructure provisioning using Terraform and cloud services on Amazon Web Services. Technical planning, decision-making, and alignment with product requirements.

Freelancer **2021 - 2022**

Front-end development in collaboration with a partner from Freelancer.com, building Single Page Applications (SPAs) and white-label solutions, including a scheduling platform based on medical workflows and documentation. Development of landing pages primarily for clients in the crypto and NFT space, with deployment and infrastructure management using Amazon Web Services EKS.

Digi Changes **2020 - 2021**

Front-end developer working with React and Redux. Contributed to the architecture of a platform used to manage marketing campaigns for companies such as X-28 (x-28.com.ar).

Freelancer **2018 - 2020**

Provisioning of web hosting and domain registrations. Deployment of websites via FTP. Configuration and customization of WordPress installations, including template modifications, plugin setup, and image/content adjustments according to client requirements.
